and the use of deadly force. The application of deadly force by law enforcement and security personnel is considered justified in defense of property involving national security which is specifically designated by the Commanding Officer as being vital or of substantial importance to national security. Additionally, the application of deadly force is considered justified in defense of property not involving national security, but which is inherently dangerous to others.

(1) In Defense of Property Involving National Security. Use of deadly force reasonably appears to be necessary for the following:

(a) To prevent the threatened theft of, damage to, or espionage aimed at property or information specifically designated in writing by a Commanding Officer or other competent authority as vital to national security.

(b) To prevent the actual theft of, damage to, or espionage aimed at property or information specifically designated in writing by a Commanding Officer or other competent authority which, though not vital to national security, is of substantial importance to national security.

(2) Property Not Involving National Security but Inherently Dangerous to Others. When deadly force reasonably appears to be necessary to prevent the actual theft or sabotage of property, such as operable weapons or ammunition, which in the hands of an unauthorized individual presents a substantial potential danger of death or serious bodily harm to others.

5. Administration and Logistics. Property will be specifically designated as vital to national security only when its loss, damage, or compromise would seriously prejudice national security or jeopardize the fulfillment of an essential national defense mission. In order for law enforcement and security personnel to apply paragraphs 4c(1) and (2) above, they must know which areas or property qualify as "Restricted Areas" per reference (c).

a. Level One. The least secure type of restricted area, it contains a security interest that if lost, stolen, compromised, or sabotaged would cause damage to the command mission and national security.

b. Level Two. The second most secure type of restricted area, it contains a security interest that if lost, stolen, compromised, or sabotaged would cause serious damage to the command mission and national security.

c. Level Three. The most secure type of restricted area, it contains a security interest that if lost, stolen, compromised, or sabotaged would cause grave damage to the command mission and national security.
