(n) SECNAVINST 5211.5E

Encl: (1) Recycling, Unit/Shop Level Qualified Recycling
Program ESOP

1. Situation

a. Per references (a) through (e), federal facilities are encouraged to implement recycling efforts as an avenue for solid waste reduction and landfill solid waste diversion. The Department of Defense (DoD) has established guidelines for the management and implementation of a Qualified Recycling Program (QRP). QRP is defined by DoD as an organized recycling operation at an installation that requires concerted efforts to divert or recover scrap or waste from the solid waste stream, as well as efforts to identify, segregate and maintain the integrity of the recyclable materials in order to maintain or enhance the marketability of the materials. Proceeds from the

DISTRIBUTION A: Approved for public release; distribution is unlimited.

JAN 31 2011

sales of authorized recyclable materials are credited to the installation QRP account. Compared to other pollution prevention (P2) programs, the QRP helps sustain Marine Corps Base Camp Lejeune's (MCB CamLej) and Marine Corps Air Station (MCAS) New River's recycling program by generating monies from the sales of recyclable materials.

b. These requirements are applicable to all organizations aboard MCB CamLej and MCAS New River, to include: any command, active, or reserve component; contractors; and staff organization and supporting agency which are affiliated with the U.S. Marine Corps (USMC), Department of Navy (DON) or DoD. This Order also applies to all organic or tenant organizations aboard the installations, and those units in transit or otherwise temporarily resident because of training or mobilization commitments. Exceptions are listed in reference (c).

2. Cancellation. BO 5090.4.

3. Mission

a. This Order outlines uniform procedures that support MCB CamLej and MCAS New River's recycling and solid waste reduction efforts.

4. Execution

a. All Organizations Aboard the Installations

(1) Actively participate in the MCB CamLej command's Qualified Recycling Program.

(2) Ensure all solid waste disposal activities are performed in accordance with references (f) through (m). Solid waste materials, items or scrap that do not appear to be covered in these references can be addressed through the Environmental Management Division (EMD) Pollution Prevention (P2) and QRP Manager and/or the Base Recycling Coordinator.

(3) Ensure respective Environmental Compliance Coordinators (ECCs)/Environmental Compliance Officers (ECOs) address organizational recycling concerns by participating as a member of the Environmental Management System (EMS) Solid Waste Working Group (WG) as necessary.

(4) Assume responsibility for all recycling containers within the unit's area of responsibility. Develop procedures at the unit level that:

(a) Discourage/prevent the illicit disposal of other solid wastes in recycling containers and actively pursue problematic units, contractors and other installation personnel in order to prevent contamination of recyclable containers and materials.

(b) Prevent the scavenging of recyclable commodities. Emphasis should be placed on securing scrap non-ferrous metals to the maximum extent practical. Ensure recycling containers that pose security risks or contamination concerns have those risks and/or concerns addressed at the Major Subordinate Command (MSC) level through the respective ECC.

(c) Protect Personally Identifying Information (PII) and For Official Use Only (FOUO) by developing Standard Operating Procedures (SOP) for shredding information prior to recycling per reference (n).

(5) Annually review unit level practices with the P2/Recycling Program Manager and Base Recycling Coordinator to identify and leverage sole source waste streams for recycling.

(6) Disseminate the recycling Environmental SOP (enclosure 1) to unit S-4s for battalion and company level dissemination and reference.

b. Commanding Officer, MCB Camp Lejeune

(1) Ensure that the sale of any QRP commodity, either via the servicing Defense Logistics Agency Disposition Service (DLADS) or the QRP, is accomplished through DLADS or other appropriate direct sale or contract service. As applicable, ensure that generated net proceeds from sales are deposited within the Installation Command's QRP account.

(2) As part of the Management Review, review Solid Waste WG objectives and targets to ensure solid waste diversion and recycling goals are aligned and meet the Installation Commanders' intent.

JAN 31 2011

(3) Provide assistance and guidance to the Solid Waste WG as necessary via the EMS Management Review Board (MRB).

c. Director, Installations and Environment (I&E).
Oversee the implementation and operation of MCB CamLej and MCAS New River's recycling program.

d. Director, Comptroller

(1) Oversee the receipt, maintenance, and disbursement of revenues generated from the recycling program.

(2) Produce quarterly and annual recycling revenue reports that account for all revenues received, maintained, and disbursed within the fiscal year/quarter, and provide copies to the Recycling Program Manager and/or the Base Recycling Coordinator via the Director, EMD.

(3) In coordination with DLADS, inspect and review DLADS' records of receipt, maintenance, and disbursement of revenue generated from the recycling program.

e. Director, S-4/S-6/Business Performance Office (BPO)

(1) Whenever practicable, procure materials made from recyclable materials and/or low toxicity chemicals.

(2) Inform the Recycling Program Manager and Landfill Manager in advance of events generating large volumes of recyclable materials (barracks furniture replacement, vehicle maintenance activities, mess-hall operations, renovation projects, etc).

(3) Ensure administrative and/or office recycling containers are made available for units to purchase through the ServMart or direct support request through the Base Recycling Office.

f. Director, Public Works Division (PWD)

(1) Operate and manage facilities, equipment, labor and contract services required that are not exclusively purchased or used by the QRP program per reference (c) to support transportation, processing and disposal of recyclables collected

JAN 31 2011

within installation military training, industrial, maintenance and administrative functional areas.

(2) Operate, manage, maintain and repair the Material Recovery Facility (MRF) and facilitate replacement of associated equipment with applicable QRP funds in a manner which supports and promotes the goals and objectives of reference (a) through (d).

(3) Incorporate provisions in contracts requiring contractors to meet the EO 13524 diversion for solid waste and construction and demolition products and/or debris to the maximum extent practicable.

(4) If applicable, incorporate and promote Leadership in Energy and Environmental Design (LEED) recycling requirements per reference (a) in new and retrofit construction projects in order to obtain project accreditation and promote the MCB CamLej's and MCAS New River's recycling efforts to increase QRP proceeds for recycling program growth and development.

(5) Provide solid waste diversion and recycling data (typically in tons) to the Base P2 Program Manager or the Recycling Coordinator for all construction, demolition and renovation projects. Data shall include, but is not limited to, the type of waste, recycled material and amount diverted.

g. Officer in Charge of Construction (OICC)

(1) The OICC reviews materials maintained by the contractor to ensure ordering and disposal practices are conducted in a manner that is compliant with Federal and State regulations, and assists in contractor LEED accreditation.

(2) OICC will provide solid waste diversion data (typically in tons) to the P2/QRP Program Manager and/or the Base Recycling Coordinator, for all construction demolition and renovation projects. Data shall include, but is not limited to, the type of waste and amount diverted. Contact the P2/QRP Program Manager and/or the Base Recycling Coordinator for additional data requirements by commodity.

(3) Ensure contractors properly sort materials and transport the materials to the Base Recycling Center and/or recycling efforts coordinated through the Base Recycling Office.

h. Director, Installation Development Division (IDD).
Ensure that all 1391, request for proposal and specifications include requirements mandated in references (a) and (b).

i. Director, Environmental Management Division (EMD)

(1) Ensure that the installations meet all applicable regulatory requirements related to pollution prevention and recycling.

(2) Ensure the EMS Solid Waste WG actively addresses recycling as a solid waste diversion measure during its quarterly meetings.

(3) Ensure Recycling Objectives and Targets are updated semi-annually through the EMS/P2/QRP Program Manager.

(4) Include recycling initiatives as part of the Command's education and outreach plan during annual Earth Day events as well as outreach and education initiatives coordinated by the Installations P2/QRP Manager and Comprehensive Environmental Training and Education Program Manager (CETEP).

j. P2/QRP Program Manager, Environmental Management Division (EMD)

(1) Serve as the Command's subject matter expert (SME) for all recycling efforts aboard the base.

(2) Assist the Landfill Supervisor in ensuring recycling container pick-up schedules are efficient based on container loads and pick up frequency.

(3) Coordinate with DLADS Disposal Specialists to ensure adequate contracts exist for the sale of recyclable materials as required.

(4) Initiate 'Direct Sale' documents for the sale of recyclable materials outside of DRMS, as necessary. Provide

JAN 31 2011

departmental accounting personnel with lists of vendors/buyers appropriate to the commodity.

(5) Continually analyze installation waste streams for recyclable commodities.

(6) Develop strategies for implementing new recyclable commodities into the Base Recycling Plan.

(7) Recommend to the Director, EMD, projects to enhance recycling as P2 initiatives.

(8) Develop and execute an annual QRP budget to include maintenance and repair cost; labor for personnel performing QRP task; equipment purchased by and used exclusively by the QRP; training, courses, conferences for recycling personnel; contractual agreements for purchase of equipment and repairs; awards and incentives; advertising; and explore avenues for funding recycling initiatives through P2 initiatives.

(9) Serve as the co-chair to the Solid Waste WG.

(10) Prepare the Solid Waste Annual Data call report and input data into U.S. Navy Environmental Portal (EPR Portal).

(11) Develop and update annually the Base Recycling Plan.

k. Base Recycling Coordinator

(1) Assist the P2/QRP Manager in analyzing current and proposed recycling programs to evaluate their potential in reaching solid waste diversion goals.

(2) Assist the P2/QRP Manager in developing and initiating a comprehensive outreach and education program designed to inform tenant and organic commands of recycling initiatives and the appropriate tie-ins with landfill diversion goals.

(3) Conduct, as appropriate, classroom instruction regarding recycling objectives as part of the ECC/ECO compliance training.

JAN 31 2011

(4) Advise unit, tenant commands, PWD, and the Landfill Management Section on all recycling and waste diversion initiatives.

(5) Notify units if PII is discovered in the white paper recycling bins. Ensure discovered PII is secured and returned to the unit for proper disposal.

1. Director, Defense Logistics Agency Disposition Services

(1) Receive, maintain and sell recyclable government materials/scrap per the references, in order to maximize support of recycling initiatives of the installations' QRP and coordinate disposal of recyclable scrap via the MCB CamLej Recycling Office, as requested.

(2) In coordination with the Comptroller, provide the QRP Manager with an accounting of revenue received from the sales of recyclable scrap via the DLADS website and/or as requested by the Installation's Recycling Office.

m. Environmental Compliance Branch

(1) Provide technical assistance relating to solid waste and recycling handling procedures.

(2) Manage the Used Oil/Used Fuel recycling program including: collection, sampling and testing of Used Oil/Used Fuel; servicing of oil/water separators and grit chambers; and storage and transport of Used Oil/Used Fuel. Provide collection amounts to the MCB CamLej Recycling Office on a monthly basis.

(3) Provide the MCB CamLej Recycling Office monthly spent battery generation rates to include, but not limited to, rechargeable lithium ion, spent lead acid, nickel-metal hydride, lithium sulfur dioxide, wet-cell and or other related batteries generated from unit level operations and accepted by the Resource Conservation & Recovery Section (RCRS).

(4) Provide training on recycling procedures during ECC and ECO training, or as requested by the Installation's Recycling Office, Landfill Operations, the servicing DLADS or Headquarters Marine Corps (HQMC).

(5) Ensure organizations are properly managing solid waste and recycling facilities through the Environmental Compliance Evaluation (ECE) program, document environmental deficiencies and elevate deficiencies to unit commands.

n. Environmental Compliance Coordinators (ECC)

(1) Serve as the MSC point of contact for matters involving recycling issues and compliance with this Order. Ensure all subordinate commands adhere to the procedures provided in the enclosure and requests disposal guidance as needed and/or required per enclosure (1).

(2) Conduct quarterly inspections of all environmental areas, including recycling storage areas. Ensure all unit/department required inspections are conducted and ensures that un-shredded PII information is not placed in the white paper recycling bins. In the absence of a unit ECO, conduct required monthly inspections to incorporate recycling efforts mandated by North Carolina, the Installation and/or HQMC.

(3) Ensure that the proper MCB CamLej recycling accounting number is entered on each scrap metal turn-in document (DD Form 1348-1A) by including the following statement "Proceeds for the sale of recyclable material are to go to the financial account - 17F3875 27RM 00767001 0 000027 3C 000000 06700198004."

o. Environmental Compliance Officers (ECO)

(1) Serve as unit/department point of contact for matters involving recycling issues and compliance with this Order, standard operating procedures and/or HQMC directives per enclosure (1).

(2) Conduct monthly inspections of all recycling containers and areas, and ensure all unit/department required inspections are conducted to promote recycling efforts at the unit level.

5. Administration and Logistics. Not Applicable.

JAN 31 2011

6. Command and Signal

a. Command. This Order is applicable to all MCB CamLej and MCAS New River commands to include tenant commands, prime contractors, subcontractors, non-appropriated personnel and all staff sections.

b. Signal. This Order is effective the date signed.

D. J. LECCE

Environmental Standing Operating Procedure (ESOP)-Shop level/Unit Level

TITLE:	RECYCLING, QUALIFIED RECYCLING PROGRAM
PURPOSE:	This SOP provides information, and identifies procedures and responsibilities associated with the collection and disposal of recyclable materials aboard MCB Camp Lejeune (MCBCL) and MCAS New River (MCASNR).
APPLICABILITY:	This SOP applies to all MCBCL and MCASNR commands, tenant commands, contractors working aboard Camp Lejeune, Reserve Units and any other command that disposes of solid waste (trash) and recyclable materials as part of their daily operations.
RESPONSIBILITY:	All Personnel
PROCEDURE:	<p>1. General Information</p> <p>1a. MCBCL and MCASNR landfills approximately 44,000 tons of solid waste per year. Approximately 24,000 to 29,000 tons of solid waste material are either recycled or treated for reuse aboard the base. This results in a landfill diversion rate of approximately 35 to 39% per year.</p> <p>1b. Solid Waste "diversion" can be met in a number of ways. Diversion can be broken down into three categories:</p> <ul style="list-style-type: none"> (1) <u>Reduce</u> – Carefully review command 'needs' and ensure procurement is limited to only the amounts required for operations. A good portion of solid waste is disposed of because it either goes bad (food) or reaches its shelf life (hazardous materials) prior to use. (2) <u>Reuse</u> – Make an effort to find homes for good material you no longer need/want. The Marine, Sailor, Coast Guardsman in the other barracks may appreciate the item. For personal items look at the option of donating to the Thrift store (451-5591) or other donation center. Hazardous Material can be turned in at Building 908 for re-issue. (3) <u>Recycle</u> – Obtain and maintain recycling collection receptacles for specific commodities with the intention that items will be marketed by the Qualified Recycling Program (QRP). Just about every commodity has a "market" for sale. Currently MCB CamLej and MCASNR sell the following commodities through direct sales and the Defense Reutilization and Marketing Office: metals (aluminum, copper, steel, stainless steel, light metal, etc.), cardboard, mixed paper, used oil, batteries. <p>1c. MCBCL operates and maintains a permitted Subtitle D solid waste landfill and a wood chipping, composting and concrete grinding facility.</p> <p>1d. Solid waste management, which includes recycling, is a time and labor intensive activity. Therefore, the more effort put into the proper segregation and collection of recyclable materials at the point of generation results in a more valuable commodity for sale through the QRP.</p>

	<p>2. Recycling Challenges</p> <p>2a. The following are challenges associated with recycling:</p> <ul style="list-style-type: none"> (1) <u>Contamination of waste streams.</u> By throwing other wastes into recycling containers, we create additional work for the Material Recovery Facility (MRF) personnel during baling. The contaminants reduce the value of the commodity for sale and in some cases, prevent it from being sold. If recycling containers are continually contaminated, units will be required to remove items, and can potentially lose their recycling containers. (2) <u>Scavenging.</u> It is illegal to remove recyclable material being collected in support of the QRP for personal gain. (3) <u>Vector/Pest control.</u> Recycling collection bins, whether inside or out, are attractive to pests if not policed. Ensure metal or plastic containers that are suitable for recycling are rinsed prior to placement in the recycling collection bin.
	<p>3. Unit/Building Specific Practices</p> <p>3a. Identify recyclable solid waste streams associated with your unit activities and daily routine, and determine if you actively collect these materials.</p> <p>3b. Compare your waste streams to those currently being recycled aboard the base. See paragraph 1.b.(3) above. Contact the Base Landfill and Recycling Coordinator to increase your participation.</p> <ul style="list-style-type: none"> (1) Utilize one of the four Base Drop-Off locations. <ul style="list-style-type: none"> (a) Piney Green Rd, Public Works, 451-2946. (b) Courthouse Bay, Engineer School Support Services, 450-7360. (c) Camp Johnson, Combat Service Support Schools, S-4, 450-0839. (d) MCASNR, Environmental Affairs Dept, 449-5997. (2) Utilize a bin located at an adjacent command. (3) Coordinate with the Base Landfill to arrange for a bin to be located at your command cluster. <p>3c Obtain office recycling bins for paper, plastic, and aluminum cans from the Base Landfill and Base Recycling Coordinator. Obtain metal hoppers or other dumpsters through the Base Landfill (451-2946) or DLA Disposition Services Lejeune Property Disposal Specialist (451-0963).</p>
	<p>3d.Utilize clear plastic garbage bags to line office recycling containers. Waste streams are easily identifiable when disposed of in this manner and require much less work on the back end by material handlers for baling. Clear plastic bags are available through ServMart.</p> <p>3e. Elevate unresolved recycling issues through the command Environmental Compliance Officer/Environmental Compliance Coordinator (ECO/ECC).</p>

4. Special Case Activities

4a. Unit Deployment.

- (1) Unit deployments place a strain on trash and recycling dumpsters located at unit barracks. Units clearing out barracks should request a roll-off container from the Base Landfill for temporary large quantity solid waste disposal. Only unserviceable materials should be disposed of at the Base Landfill.
- (2) Do NOT render an item unserviceable in order to dispose of it at the Base Landfill. Such action may be punishable under the UCMJ.

4b. Serviceable White Goods (ovens, microwaves etc), Furniture, Electronics

- (1) These items require significant space for storage prior to sale and are not necessarily sold as 'recycled' products.
- (2) Reuse is the preferred option for disposition. Utilize local and community Thrift/Donation centers for items not belonging on a managed account.
- (3) Items listed on a Property Account are required to be disposed of via Base Property or DLA Disposition Services Lejeune, accordingly.

4c. Hazardous Material Containers (aerosol cans, oil cans etc) and used oil.

- (1) Turn in containers in accordance with BO 5090.9, Hazardous Material/Waste Management.
- (2) Turn in used oil/fuel in accordance with BO 5090.91, Used Oil/Used Fuel and Pollution Abatement Facility Management.

4d. Field Training

- (1) MRE boxes are recyclable. Identified as 'boxboard' or 'paperboard', the large boxes contain resins for strength. Boxboard cannot be sold with regular corrugated cardboard, therefore, MRE boxes need to be collected separately from standard corrugated cardboard. Collect all large and smaller MRE boxboard in a separate container. Containers can be requested from the Base Landfill.
- (2) Other recyclables are generated during field activities. Coordinate with the Base Landfill and Recycling Program Manager to discuss options for segregation and collection.

	<p>4e. Demolition, Renovation and Construction</p> <ul style="list-style-type: none"> (1) Comply with reuse and recycling requirements outlined in the contract. (2) Forward type and weight of recycled materials to the Pollution Prevention Program Manager via the contracting representative. (3) Review "MCB CamLej Contractor Environmental Guide" for additional best management practices associated with recycling. Handbooks will be provided by the appropriate Contracting Representative or can be obtained from the EMD website: http://www.lejeune.usmc.mil/emd/ <p>4f. Personally Identifying Information (PII) and For Official Use Only (FOUO)</p> <ul style="list-style-type: none"> (1) Comply with SECNAVINST 5211.5E and MARADMIN 491/08. (2) After cross-shredding PII and FOUO may be placed in the recycling containers. Military and civilian personnel may use the large industrial shredder located at the Landfill for bulk shredding. For appointments contact the Recycling Coordinator (910-451-4214).
	<p>5. Environmental Management System (EMS), Solid Waste Working Group</p> <p>5a. The EMS Solid Waste Working Group addresses solid waste and recycling issues encountered aboard MCBCL and MCASNR. The working Group meets quarterly to address landfill and treatment facility objectives, targets, and to address recycling program issues and/or concerns.</p> <p>5b. ECCs and ECOs with specific unit level concerns are highly encouraged to become a member of the Working Group. Contact the Solid Waste Working Group Leader via the Lejeune Environmental Management Portal for inclusion on the Working Group roster. https://intranet.emportal.usmc.mil/sites/le/default.aspx. Click on the EMS link at the top left of the page, and follow to the Solid Waste Working Group.</p> <p>5c. Contact the Environmental Management System Program Manager for additional information at 451-5003.</p>
<p>EXECUTION:</p>	<p>1. Recycling Container Support</p> <p>1a. <u>Exterior Dumpsters</u>: Units/Commands may submit a work request via their S-4 office to the Public Works Division, Work Reception Bldg 1005. The request should include unit name, building number, number of containers requested and where the containers will be physically located.</p> <p>1b. <u>Interior/Common Area Containers</u>: Units/Commands may submit a request to the Base Recycling Coordinator at 910-451-4214 DSN:751-4214 for container support. Interior bins are issued on a first-come, first-served basis. Units/Commands may also purchase interior bins from ServMart as needed.</p>

	<p>1c. <u>Pick-up Support</u>: Exterior recycling dumpsters that have been formally requested through the Public Works Division and issued via the Landfill, are emptied on an as-needed/requested basis. It is the responsibility of the generating unit/command to transport recyclables collected from interior containers to one of 5, consolidated recycle locations located throughout MCB Camp Lejeune. Contact the Base Recycling Coordinator at 910-451-4214 DSN: 751-4214 to confirm locations.</p> <p>1d. <u>Contamination</u>: Contamination of recycling containers is a common problem aboard the installations. The Base Landfill/Recycling Office's only avenue to curb such contamination levels is to remove a recycling container from a unit that habitually increases landfill workload, decreases the generation of a marketable material and exhausts valuable landfill space. Units that contaminate recycling dumpsters will be initially warned of the offense. Further unsuccessful attempts to eliminate contamination will result in removal of the recycling container until contamination concerns have been addressed.</p> <p>2. Common Recyclable Materials</p> <p>2a. The Landfill/Recycling Office collects, bales, stages and/or stores comingled paper, corrugated cardboard, plastics (#1-#7) and clear/colored glass. Scrap metals such as light and heavy steel, brass, aluminum and stainless steel are disposed of through the servicing DLA Disposition Services Lejeune via an electronic turn in document (ETID). For MCASNR commands, ensure that the proper MCAS recycling accounting number is entered on each scrap metal turn-in document (DD Form 1348-1A) by including the following statement "Proceeds for the sale of recyclable material are to go to the financial account- 17F3875 27RM 00767001 0 000027 3C 000000".</p>
<p>REGULATORY CITATION:</p>	<ul style="list-style-type: none"> • DOD Inst 4715.4, Pollution Prevention • MCO P5090.2A, Environmental Compliance and Protection Manual • MCO P10150.1, Garrison Property Policy Manual • BO 5090.9, Hazardous Material/Waste Management • BO 5090.17, Recycling, Qualified Recycling Program • BO 5090.91, Used Oil/Used Fuel and Pollution Abatement Facility Management • BO 11350.2D, Refuse Disposal Procedures • BO P11014.1J, Base Maintenance Manual • BO 11100.5R, Designation, Responsibilities, Police, and Authority of Area Commanders
